Monitoring-without-indicators The 'story' approach

Developing capacity with Southern partners can be achieved with the aid of various qualitative and participative Planning, Monitoring and Evaluation methods. 'Most Significant Change' (MSC) was recently developed and has proved to be inspirational in learning about change processes.

Interested?

The Learning event will provide basic insights into the method. During the Pit-stop, those with (more) experience with the method will be offered the opportunity to exchange experiences and knowledge with others. To sign up, send an email before the 18th of September to: aanmelding@pso.nl, mentioning 'MSC' and the date(s) you wish to take part. Any questions? Please contact Cristien Temmink at temmink@pso.nl
