

INVITATION

Exchanging experiences on the use of the 5 capabilities in the MFS 2 baselines February 14th, Utrecht

Partos and PSO kindly invite you to join an exchange meeting on the use of the 5C approach in the MFS 2 processes.

PARTOS and PSO will share with you the main findings and analysis from the interviews that were held with all MFS 2 Alliances during December 2011 and January 2012, on experiences and working methods with the 5C. The results and emerging issues will be shared and taken as starting point to the exchange during the event. The goal of the event is to exchange the gained experiences, learn on the use of the 5C approach, understand what works and why.

Is this for you?

All M&E officers, knowledge and evaluation managers and learning facilitators of MFS 2 organisations, Partos and PSO member organisations, and other interested individuals are welcome.

Appetizer:

inspiration session on Belgium experiences with 5C approach!

In Belgium a few development organisations started to work with the 5C model. VIA Don Bosco is one of them. Not "under duress" as in the MFS 2, but because the model inspires and brings to light those aspects of capacity that really matter. **Maud Seghers, Knowledge Management Officer**, will present how VIA Don Bosco has operationalized the 5C model with and for the Southern partner organisations from Latin-America, Sub-Saharan Africa

and India. The basic principle used: work in a way that is tailor-made to the partners. A story about enthusiasm, identity, and - what else? - conceptual and practical challenges.

Time: 9.15 to 10.30 hrs, at the same location. Open for all interested public, no need to register!

Practical information

What Exchange meeting
Where Silverijn, Plompstorengracht 3, Utrecht
When 14th of February 2012, from 9.15 hrs or 11.00 to 17.00 hours
